Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878

**SAFETY DATA SHEET** 

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

# **1.1 Product identifier**

**Product name Product code** SDS # **Product type** 

Castrol POWER1 Scooter 4T 5W-40 465169-BE02 465169 Liquid.

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

	Identified uses
	nd greases in vehicles or machinery-Industrial nd greases in vehicles or machinery-Professional
Use of the substance/ mixture	Motorcycle engine oil. For specific application advice see appropriate Technical Data Sheet or consult our company representative.
.3 Details of the supplier of	of the safety data sheet
Supplier	Castrol Holdings Europe B.V., d'Arcyweg 76, 3198NA Europoort Rotterdam
	Castrol Germany GmbH, Überseeallee 1, 20457 Hamburg
	+49 (0) 800 863 73 70
E-mail address	MSDSadvice@bp.com
I.4 Emergency telephone n	umber
EMERGENCY TELEPHONE NUMBER	Carechem: +44 (0) 1235 239 670 (24/7)

### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

**Product definition** 

Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Aquatic Chronic 3, H412

See Section 16 for the full text of the H statements declared above.

See sections 11 and 12 for more detailed information on health effects and symptoms and environmental hazards.

Product name Castrol POWE	R1 Scooter 4T 5W-40	Product code 465169-BE02	Page: 1/18
Supplemental label elements	Not applicable.		
Hazardous ingredients	Not applicable.		
Disposal	P501 - Dispose of contents and contain international regulations.	er in accordance with all local, regiona	al, national and
Storage	Not applicable.		
Response	Not applicable.		
Prevention	P273 - Avoid release to the environmen	t.	
General	P102 - Keep out of reach of children. P101 - If medical advice is needed, have	e product container or label at hand.	
Hazard statements	H412 - Harmful to aquatic life with long	asting effects.	
2.2 Label elements Signal word	No signal word.		

Product name	Castrol POWER	R1 Scooter 4T 5W-40		Product code	465169-B	E02	Page: 1/18
Version 1	Date of issue	1 December 2024	Format	Germany		Language	ENGLISH
Date of previo	ous issue	No previous validation.		(Germany)			

# **SECTION 2: Hazards identification**

EU Regulation (EC) No. 1907/	2006 (REACH)
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances,	Not applicable.
mixtures and articles	
Special packaging requireme	<u>nts</u>
Containers to be fitted with child-resistant fastenings	Not applicable.
Tactile warning of danger	Not applicable.
2.3 Other hazards	
Results of PBT and vPvB assessment	Product does not meet the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII.
Product meets the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII	This mixture does not contain any substances that are assessed to be a PBT or a vPvB.
Other hazards which do not result in classification	Defatting to the skin. USED ENGINE OILS Used engine oil may contain hazardous components which have the potential to cause skin cancer. See Toxicological Information, section 11 of this Safety Data Sheet.

# **SECTION 3: Composition/information on ingredients**

3.2 Mixtures

**Product definition** 

Mixture

Highly refined base oil (IP 346 DMSO extract < 3%). Proprietary performance additives.

Product/ingredient name	Identifiers	%	Classification	Specific Conc. Limits, M-factors and ATEs	Туре

#### See Section 16 for the full text of the H statements declared above.

[1] Substance classified with a health or environmental hazard

Product name	Castrol POWE	R1 Scooter 4T 5W-40		Product code 465	169-BE02	Page: 2/18
Version 1	Date of issue	a 1 December 2024	Format	Germany	Language	ENGLISH
Date of previo	ous issue	No previous validation.		(Germany)		

### **SECTION 4: First aid measures**

4.1 Description of first aid meas	sures
Eye contact	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention.
Skin contact	Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if irritation develops.
Inhalation	If inhaled, remove to fresh air. Get medical attention if symptoms occur.
Ingestion	Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Get medical attention if symptoms occur.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

### 4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

Potential acute health effects	
Inhalation	Vapour inhalation under ambient conditions is not normally a problem due to low vapour pressure.
Ingestion	No known significant effects or critical hazards.
Skin contact	Defatting to the skin. May cause skin dryness and irritation.
Eye contact	No known significant effects or critical hazards.
Delayed and immediate effects	as well as chronic effects from short and long-term exposure
Inhalation	Overexposure to the inhalation of airborne droplets or aerosols may cause irritation of the respiratory tract.
Ingestion	Ingestion of large quantities may cause nausea and diarrhoea.
Skin contact	Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis.
Eye contact	Potential risk of transient stinging or redness if accidental eye contact occurs.

#### 4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician

Treatment should in general be symptomatic and directed to relieving any effects.

### **SECTION 5: Firefighting measures**

5.1 Extinguishing media					
Suitable extinguishing         Use foam or all-purpose dry chemical to extinguish.           media					
Unsuitable extinguishing media	<b>g</b> Do not use water jet. The use of a water jet may cause the fire to spread by splashing the burning product.				
5.2 Special hazards arising from	n the substance or mixture				
Hazards from the substance or mixture	In a fire or if heated, a pressure increase will occur and the container may burst.				
Hazardous combustion	Combustion products may include the following:				
products	carbon oxides (CO, CO <sub>2</sub> ) (carbon monoxide, carbon dioxide)				
5.3 Advice for firefighters					
Special precautions for fire-fighters	No action shall be taken involving any personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. This material is harmful to aquatic organisms. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.				
Special protective equipment for fire-fighters	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.				

Product name	Castrol POWE	R1 Scooter 4T 5W-40		Product code	465169-B	E02	Page: 3/18
Version 1	Date of issue	1 December 2024	Format	Germany		Language	ENGLISH
Date of previo	ous issue	No previous validation.		(Germany)			

# **SECTION 6: Accidental release measures**

6.1 Personal precautions, prot	ective equipment and emergency procedures
For non-emergency personnel	Contact emergency personnel. No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Floors may be slippery; use care to avoid falling. Avoid breathing vapour or mist. Provide adequate ventilation. Put on appropriate personal protective equipment.
For emergency responders	Entry into a confined space or poorly ventilated area contaminated with vapour, mist or fume is extremely hazardous without the correct respiratory protective equipment and a safe system of work. Wear self-contained breathing apparatus. Wear a suitable chemical protective suit. Chemical resistant boots. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.
6.3 Methods and material for c	containment and cleaning up
Small spill	Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Contaminated absorbent material may pose the same hazard as the spilt product. Dispose of via a licensed waste disposal contractor.
6.4 Reference to other sections	See Section 1 for emergency contact information. See Section 5 for firefighting measures. See Section 8 for information on appropriate personal protective equipment. See Section 12 for environmental precautions. See Section 13 for additional waste treatment information.

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

7.1 Precautions for safe hand	dling
Protective measures	Put on appropriate personal protective equipment. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapour or mist. Avoid contact of spilt material and runoff with soil and surface waterways. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Do not reuse container. Empty containers retain product residue and can be hazardous.
Advice on general occupational hygiene	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Wash thoroughly after handling. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
7.2 Conditions for safe storage, including any incompatibilities	Store in accordance with local regulations. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Keep away from heat and direct sunlight. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Store and use only in equipment/ containers designed for use with this product. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.
Not suitable	Prolonged exposure to elevated temperature.
Germany - Storage code	10
7.3 Specific end use(s)	
Recommendations	See section 1.2 and Exposure scenarios in annex, if applicable.

Product name Castrol POWER1 Scooter 4T 5W-40			Product code 465169-BE02			Page: 4/18	
Version 1	Date of issue	1 December 2024	Format	Germany		Language	ENGLISH
Date of previo	ous issue	No previous validation.		(Germany)			

### SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

<b>Occupat</b>	ional	exposure	limits

No exposure limit value known.

**Recommended monitoring** Reference should be made to monitoring standards, such as the following: European Standard procedures EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **Biological exposure indices**

#### **Product/ingredient name**

#### **Exposure indices**

No exposure indices known.

#### **Derived No Effect Level**

Product/ingredient name	Туре	Expo	osure	Value	Population	Effects
Bis (2-hydroxyethyl) tallow alkylamine	DNEL	Long term Inhalation	-	2.96 mg/m <sup>3</sup>	Workers	Systemic
	DNEL	Long term Dermal	-	0.3 mg/kg bw/ day	Workers	Systemic
	DNEL	Long term Inhalation	-	0.522 mg/m <sup>3</sup>	General population	Systemic
	DNEL	Long term Dermal	-	0.21 mg/kg bw/ day	General population	Systemic
	DNEL	Long term Oral	-	0.21 mg/kg bw/ day	General population	Systemic

#### **Predicted No Effect Concentration**

Product/ingredient name	Compartment Detail	Value	Method Detail
Bis (2-hydroxyethyl) tallow alkylamine	Fresh water	0.00021 mg/l	-
	Marine water	0.000021 mg/l	-
	Sewage Treatment Plant	1.5 mg/l	-
	Fresh water sediment	1.692 mg/kg dwt	-
	Marine water sediment	0.1692 mg/kg dwt	-
	Soil	5 mg/kg dwt	-

8.2 Exposure controls							
Appropriate engineering controls Provide exhaust ventilation or other engineering controls to keep the relevant airborne concentrations below their respective occupational exposure limits. All activities involving chemicals should be assessed for their risks to health, to ensure exposures are adequately controlled. Personal protective equipment should only be con- after other forms of control measures (e.g. engineering controls) have been suitably en- Personal protective equipment should conform to appropriate standards, be suitable for kept in good condition and properly maintained. Your supplier of personal protective equipment should be consulted for advice on sele appropriate standards. For further information contact your national organisation for s The final choice of protective equipment will depend upon a risk assessment. It is impo- ensure that all items of personal protective equipment are compatible.							
Individual protection measured	ures						
Hygiene measures	smoking and using the lavatory ar	d face thoroughly after handling chemical products, before eating, atory and at the end of the working period. Ensure that eyewash rs are close to the workstation location.

Eye/face protection	Safety glasses with side shields.						
Skin protection							
Product name Castrol POWE	R1 Scooter 4T 5W-40		Product code 46516	9-BE02	Page: 5/18		
Version 1 Date of issue	1 December 2024	Format	Germany	Language	ENGLISH		
Date of previous issue	No previous validation.		(Germany)				

Hand protection	sure controls/personal protection General Information:
	Because specific work environments and material handling practices vary, safety procedures
	should be developed for each intended application. The correct choice of protective gloves depends upon the chemicals being handled, and the conditions of work and use. Most gloves provide protection for only a limited time before they must be discarded and replaced (even the best chemically resistant gloves will break down after repeated chemical exposures).
	Gloves should be chosen in consultation with the supplier / manufacturer and taking account a full assessment of the working conditions.
	Recommended: Nitrile gloves. Breakthrough time:
	Breakthrough time data are generated by glove manufacturers under laboratory test condition and represent how long a glove can be expected to provide effective permeation resistance. is important when following breakthrough time recommendations that actual workplace conditions are taken into account. Always consult with your glove supplier for up-to-date technical information on breakthrough times for the recommended glove type. Our recommendations on the selection of gloves are as follows:
	Continuous contact:
	Gloves with a minimum breakthrough time of 240 minutes, or >480 minutes if suitable gloves can be obtained. If suitable gloves are not available to offer that level of protection, gloves with shorter breakthrough times may be acceptable as long as appropriate glove maintenance and replacement regimes are determined and adhered to.
	Short-term / splash protection:
	Recommended breakthrough times as above. It is recognised that for short-term, transient exposures, gloves with shorter breakthrough tim may commonly be used. Therefore, appropriate maintenance and replacement regimes must be determined and rigorously followed.
	Glove Thickness:
	For general applications, we recommend gloves with a thickness typically greater than 0.35 n
	It should be emphasised that glove thickness is not necessarily a good predictor of glove resistance to a specific chemical, as the permeation efficiency of the glove will be dependent on the exact composition of the glove material. Therefore, glove selection should also be bas on consideration of the task requirements and knowledge of breakthrough times. Glove thickness may also vary depending on the glove manufacturer, the glove type and the glove model. Therefore, the manufacturers' technical data should always be taken into account to ensure selection of the most appropriate glove for the task.
	Note: Depending on the activity being conducted, gloves of varying thickness may be require for specific tasks. For example:
	<ul> <li>Thinner gloves (down to 0.1 mm or less) may be required where a high degree of manual dexterity is needed. However, these gloves are only likely to give short duration protection an would normally be just for single use applications, then disposed of.</li> </ul>
	• Thicker gloves (up to 3 mm or more) may be required where there is a mechanical (as we as a chemical) risk i.e. where there is abrasion or puncture potential.
Skin and body	Use of protective clothing is good industrial practice. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this
	product. Cotton or polyester/cotton overalls will only provide protection against light superficial

Cotton or polyester/cotton overalls will only provide protection against light superficial contamination that will not soak through to the skin. Overalls should be laundered on a regular basis. When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required.

Product name Castrol POWER1 Scooter 4T 5W-40			Product code 465169-	Page: 6/18		
Version 1	Date of issue	1 December 2024	Format	Germany	Language	ENGLISH
Date of previo	ous issue	No previous validation.		(Germany)		

# **SECTION 8: Exposure controls/personal protection**

Refer to standards:	Respiratory protection: EN 529
	Gloves: EN 420, EN 374
	Eye protection: EN 166
	Filtering half-mask: EN 149
	Filtering half-mask with valve: EN 405
	Half-mask: EN 140 plus filter
	Full-face mask: EN 136 plus filter
	Particulate filters: EN 143
	Gas/combined filters: EN 14387
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

9.1 Information on basic physical a	ind chemical properties
Physical state	Liquid.
Colour	Amber. [Light]
Odour	Not available.
Odour threshold	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	Not available.
Flammability	Not available.
Lower and upper explosion limit	Not available.
Flash point	Closed cup: >180°C (>356°F) [Pensky-Martens]
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
рН	Not applicable.
Kinematic viscosity	Kinematic: 88.21 mm²/s (88.21 cSt) at 40°C Kinematic: 13.7 to 14.9 mm²/s (13.7 to 14.9 cSt) at 100°C

### Solubility

	Media	Result
	water	Not soluble
Partition coefficient n-octanol/ water (log value)	Not applicable.	
Vapour pressure	>0.01 kPa	
Density and/or Relative density	<1000 kg/m³ (<1 g/cm³	) at 15°C
Relative vapour density	Not available.	
Particle characteristics		
Median particle size	Not applicable.	
9.2 Other information		
Evaporation rate	Not available.	
Explosive properties	Not available.	
Oxidising properties	Not available.	
Pour point	-36 °C	

# **SECTION 10: Stability and reactivity**

10.1 Reactivity	No specific test data available for this product. Refer to Conditions to avoid and Incompatible materials for additional information.
10.2 Chemical stability	The product is stable.
10.3 Possibility of hazardous reactions	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerisation will not occur.

Product name Castrol POWER1 Scooter 4T 5W-40			Product code 465169-BE02			Page: 7/18

Delayed and immediate effec	ts as well as chronic effects from short and long-term exposure					
Inhalation	Overexposure to the inhalation of airborne droplets or aerosols may cause irritation of the respiratory tract.					
Ingestion	Ingestion of large quantities may cause nausea and diarrhoea.					
Skin contact	Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis.					
Eye contact	Potential risk of transient stinging or redness if accidental eye contact occurs.					
Potential chronic health effect	<u>ets</u>					
General	USED ENGINE OILS Combustion products resulting from the operation of internal combustion engines contaminate engine oils during use. Used engine oil may contain hazardous components which have the potential to cause skin cancer. Frequent or prolonged contact with all types and makes of used engine oil must therefore be avoided and a high standard of personal hygiene maintained.					
Carcinogenicity	No known significant effects or critical hazards.					
Mutagenicity	No known significant effects or critical hazards.					
Developmental effects	No known significant effects or critical hazards.					
Fertility effects	No known significant effects or critical hazards.					

#### 11.2 Information on other hazards

**11.2.1 Endocrine disrupting properties** Not available.

11.2.2 Other information

Not available.

Environmental hazards

Harmful to aquatic life with long lasting effects.

### 12.2 Persistence and degradability

Expected to be biodegradable.

Product/ingredient name	Test authority / Test number	Result - Exposure	Remarks
Distillates (petroleum), hydrotreated heavy paraffinic	OECD 301F	31 % - Not readily - 28 days	Based on studies with similar substances.
Distillates (petroleum), hydrotreated light paraffinic	OECD 301F	31 % - Not readily - 28 days	Based on studies with similar substances.
Distillates (petroleum), solvent- dewaxed heavy paraffinic	OECD 301F	31 % - Not readily - 28 days	Based on studies with similar substances.
Distillates (petroleum), solvent- dewaxed light paraffinic	OECD 301F	31 % - Not readily - 28 days	Based on studies with similar substances.
Bis (2-hydroxyethyl) tallow alkylamine	OECD 301D	61 to 65 % - Readily - 28 days	-

### 12.3 Bioaccumulative potential

This product is not expected to bioaccumulate through food chains in the environment.

Product/ingredient name	LogP <sub>ow</sub>	BCF	Potential
2,2'-(C16-18 (evennumbered, C18 unsaturated) alkyl imino) diethanol	3.6	-	Low

12.4 Mobility in soil	
Soil/water partition coefficient (K <sub>oc</sub> )	Not available.
Mobility	Spillages may penetrate the soil causing ground water contamination.

### 12.5 Results of PBT and vPvB assessment

Product does not meet the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII.

12.6 Endocrine disrupting properties	Not available.
Other ecological information	Spills may form a film on water surfaces causing physical damage to organisms. Oxygen transfer could also be impaired.
12.7 Other adverse effects	No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

Yes.

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 13.1 Waste treatment methods

**Product** 

Methods of disposal

Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations.

#### Hazardous waste European waste catalogue (EWC)

Waste code	Waste designation
13 02 05*	mineral-based non-chlorinated engine, gear and lubricating oils

However, deviation from the intended use and/or the presence of any potential contaminants may require an alternative waste disposal code to be assigned by the end user.

#### Packaging

Methods of disposal	Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations.
Special precautions	This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Empty containers represent a fire hazard as they may contain flammable product residues and vapour. Never weld, solder or braze empty containers. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

### **SECTION 16: Other information**

All reasonably practicable steps have been taken to ensure this data sheet and the health, safety and environmental information contained in it is accurate as of the date specified below. No warranty or representation, express or implied is made as to the accuracy or completeness of the data and information in this data sheet.

The data and advice given apply when the product is sold for the stated application or applications. You should not use the product other than for the stated application or applications without seeking advice from BP Group.

It is the user's obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. The BP Group shall not be responsible for any damage or injury resulting from use, other than the stated product use of the material, from any failure to adhere to recommendations, or from any hazards inherent in the nature of the material. Purchasers of the product for supply to a third party for use at work, have a duty to take all necessary steps to ensure that any person handling or using the product is provided with the information in this sheet. Employers have a duty to tell employees and others who may be affected of any hazards described in this sheet and of any precautions that should be taken. You can contact the BP Group to ensure that this document is the most current available. Alteration of this document is strictly prohibited.
